

I am so excited today. Because I did well in school this year, my parents are taking me to the aquarium. I am taking my friend, Bobby!

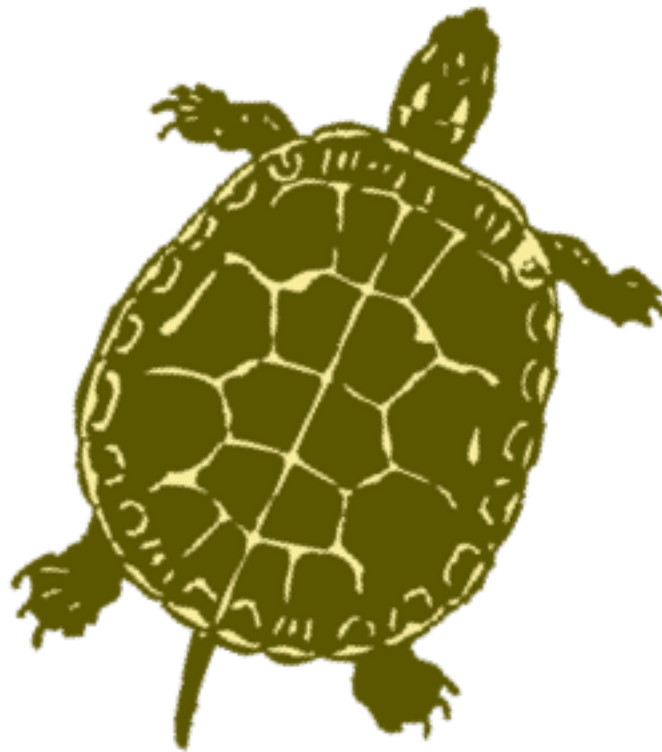

I absolutely love going to the aquarium because there is so much to do and see there.
My favourite animal is a sea turtle!

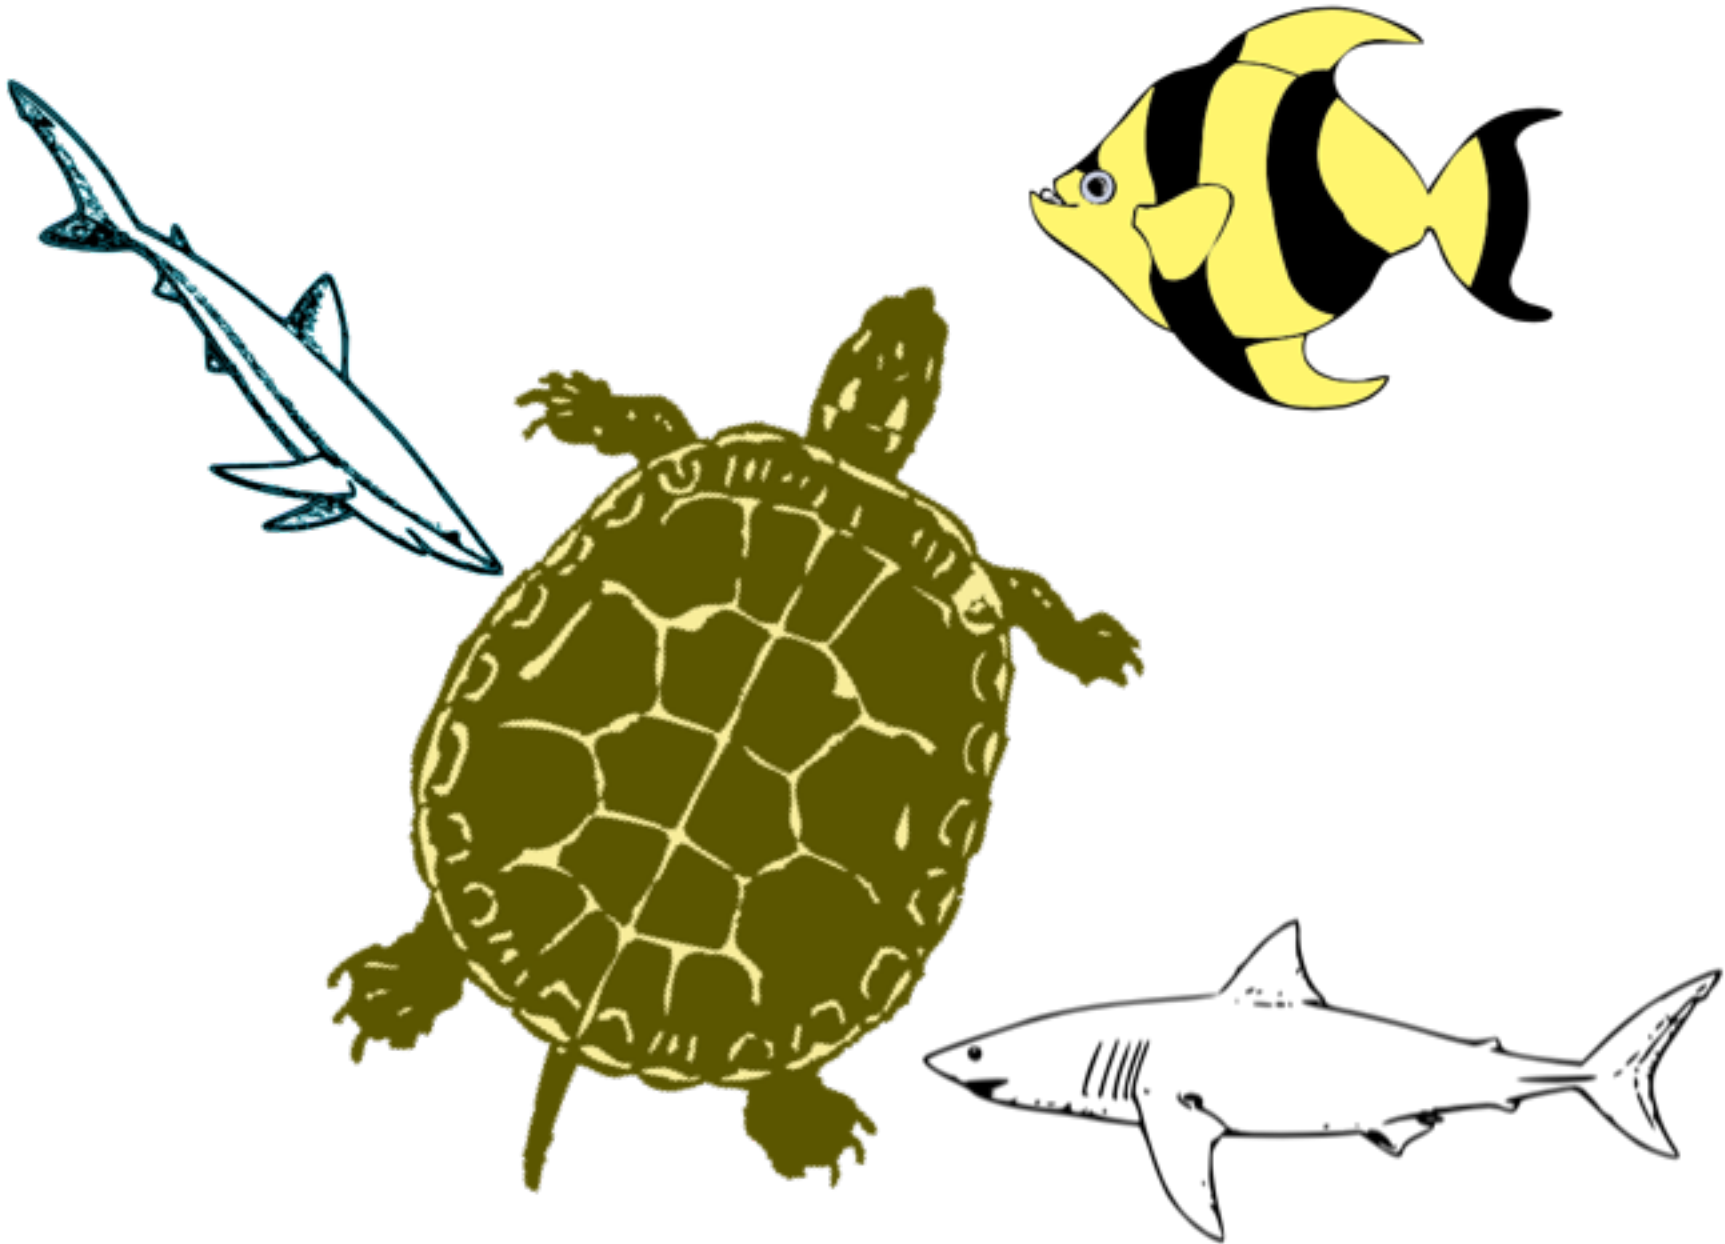

This trip will be extra fun because my friend Bobby will be coming with me, and we will get to explore the aquarium together. How exciting!

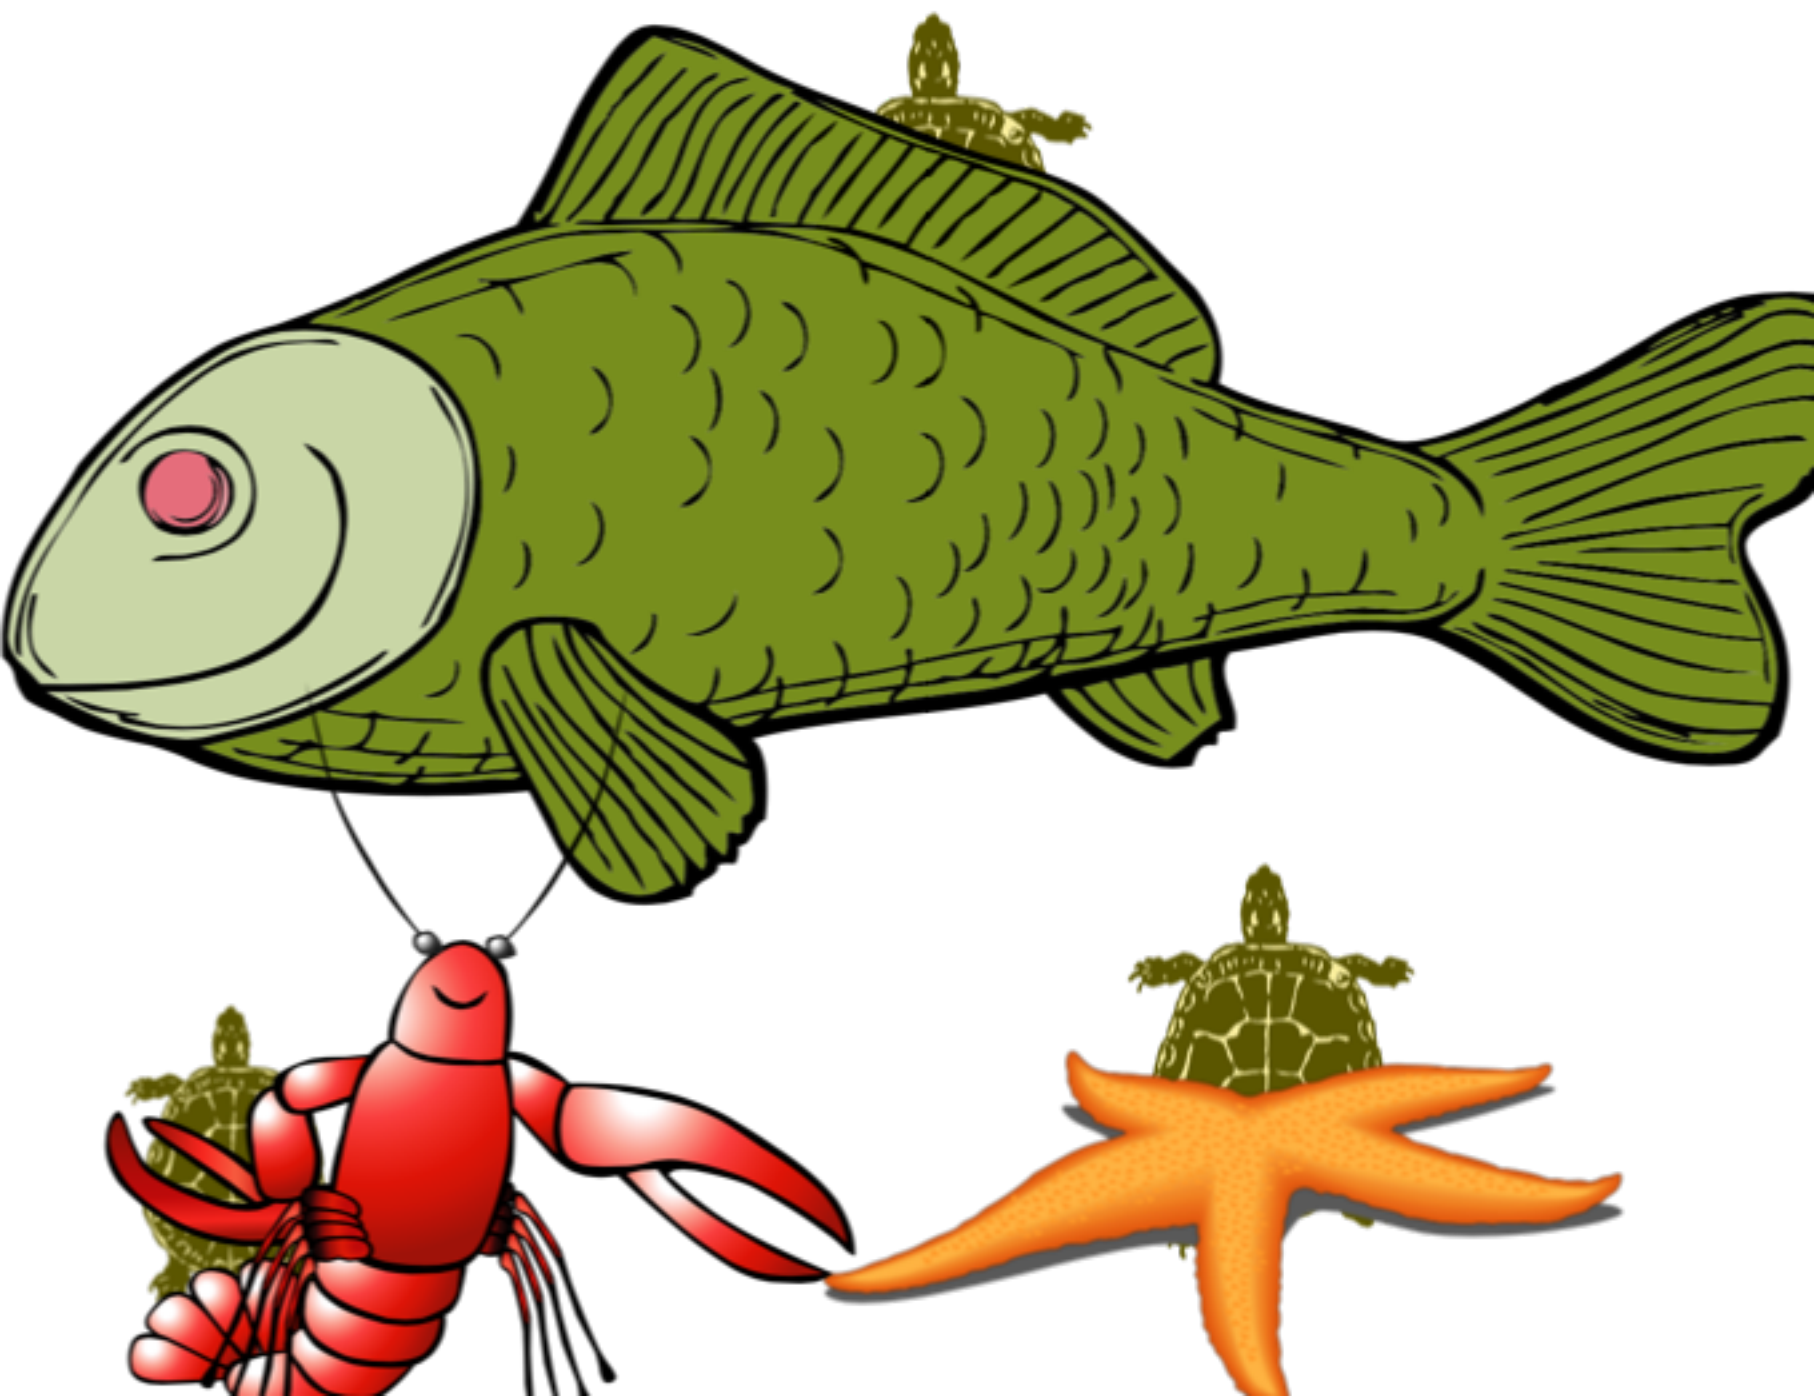

My favorite animals at the
aquarium are the sea turtles.

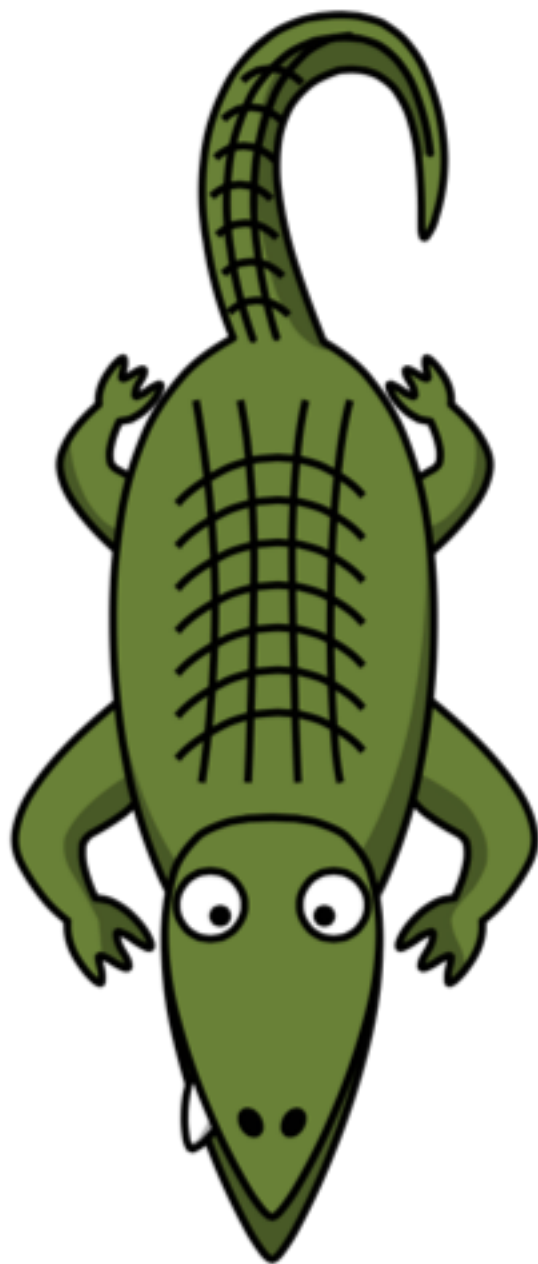

They swim in a huge tank with a bunch of other ocean creatures, including fish and sharks. They have heavy shells and sharp teeth that protect them from predators.

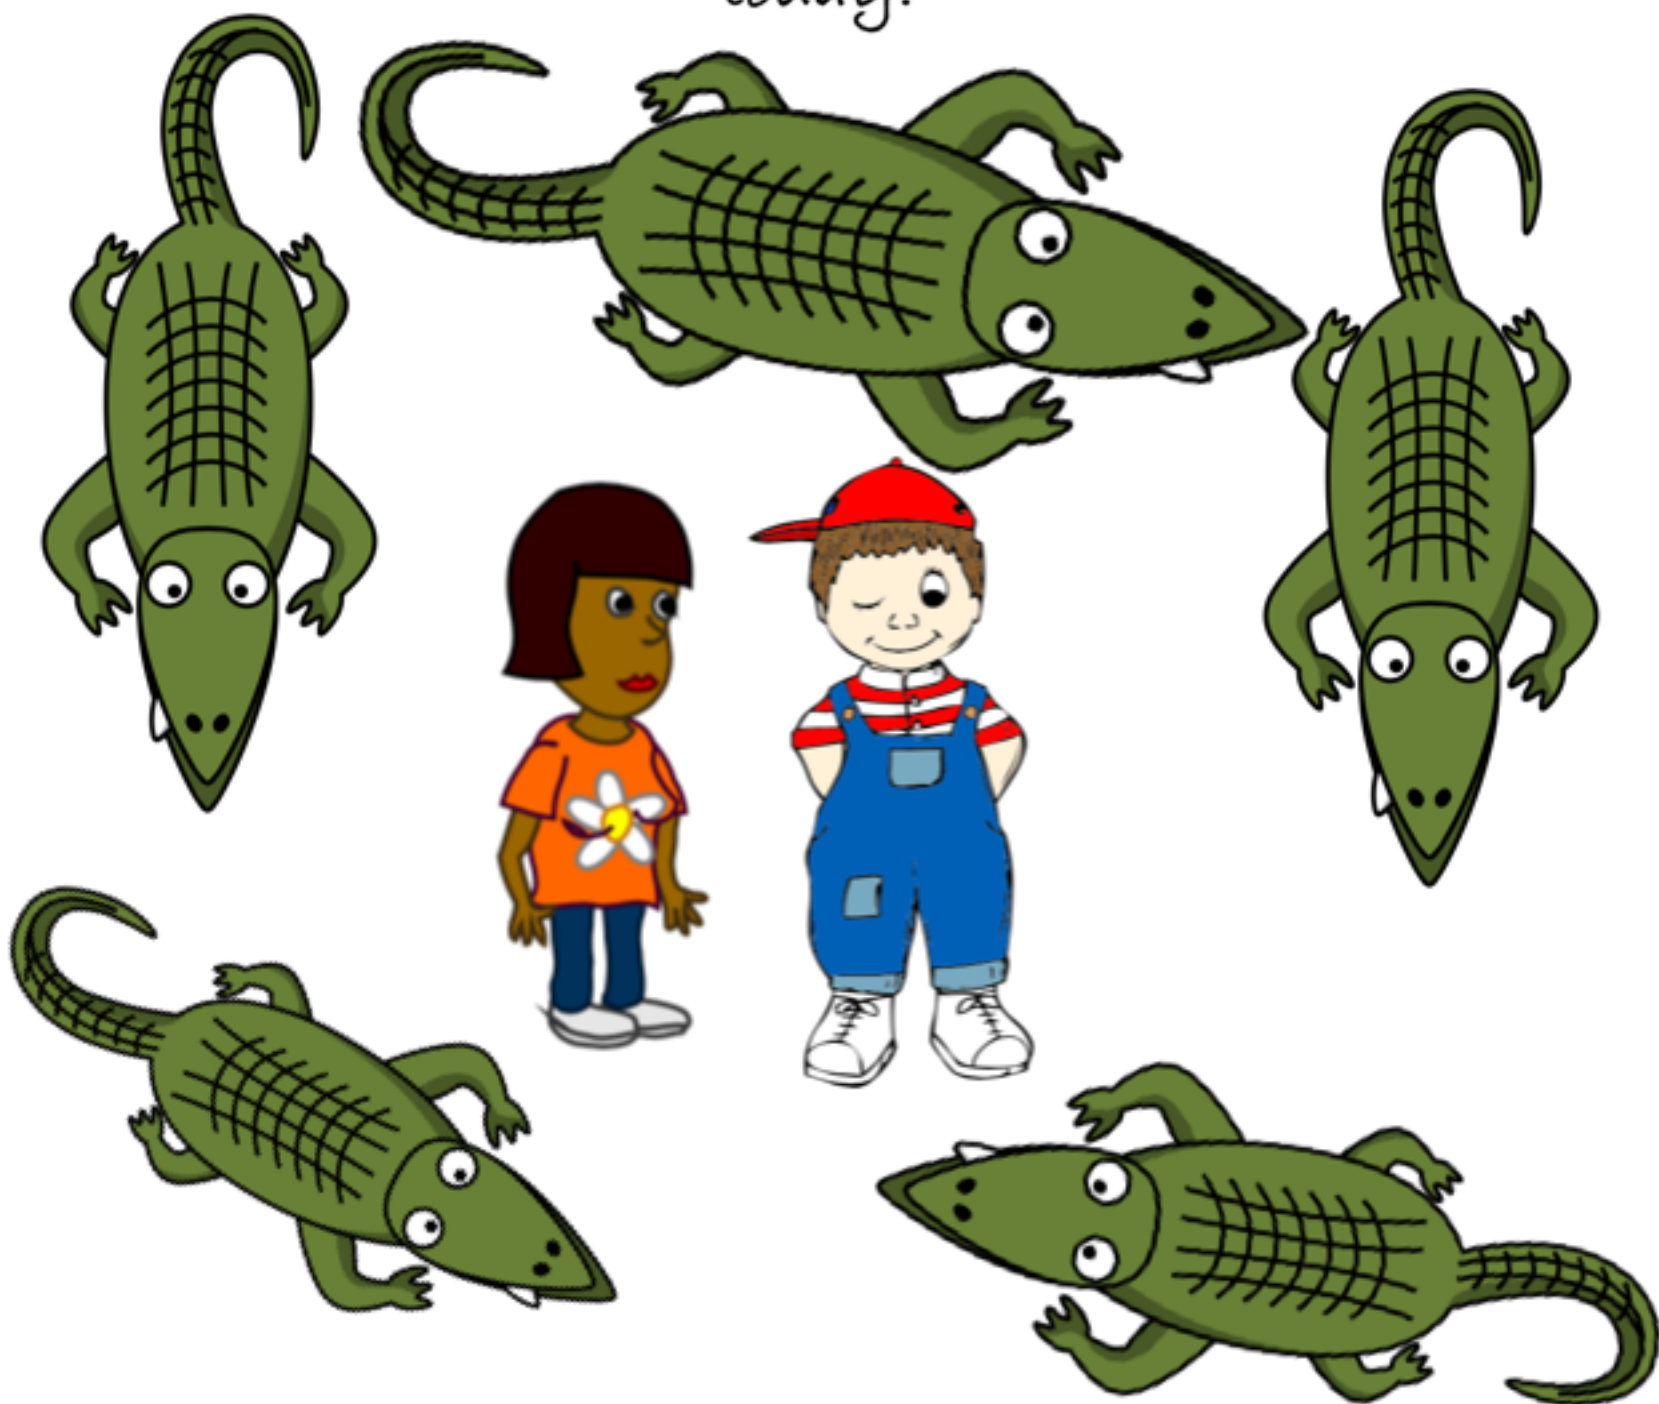

I like to try to count the sea turtles in the tank. The aquarium does not have too many turtles, so finding them can be quite a challenge! Can you find the turtles?

Another creature I like to see at the aquarium is the alligator. The alligators usually get a case all to themselves.

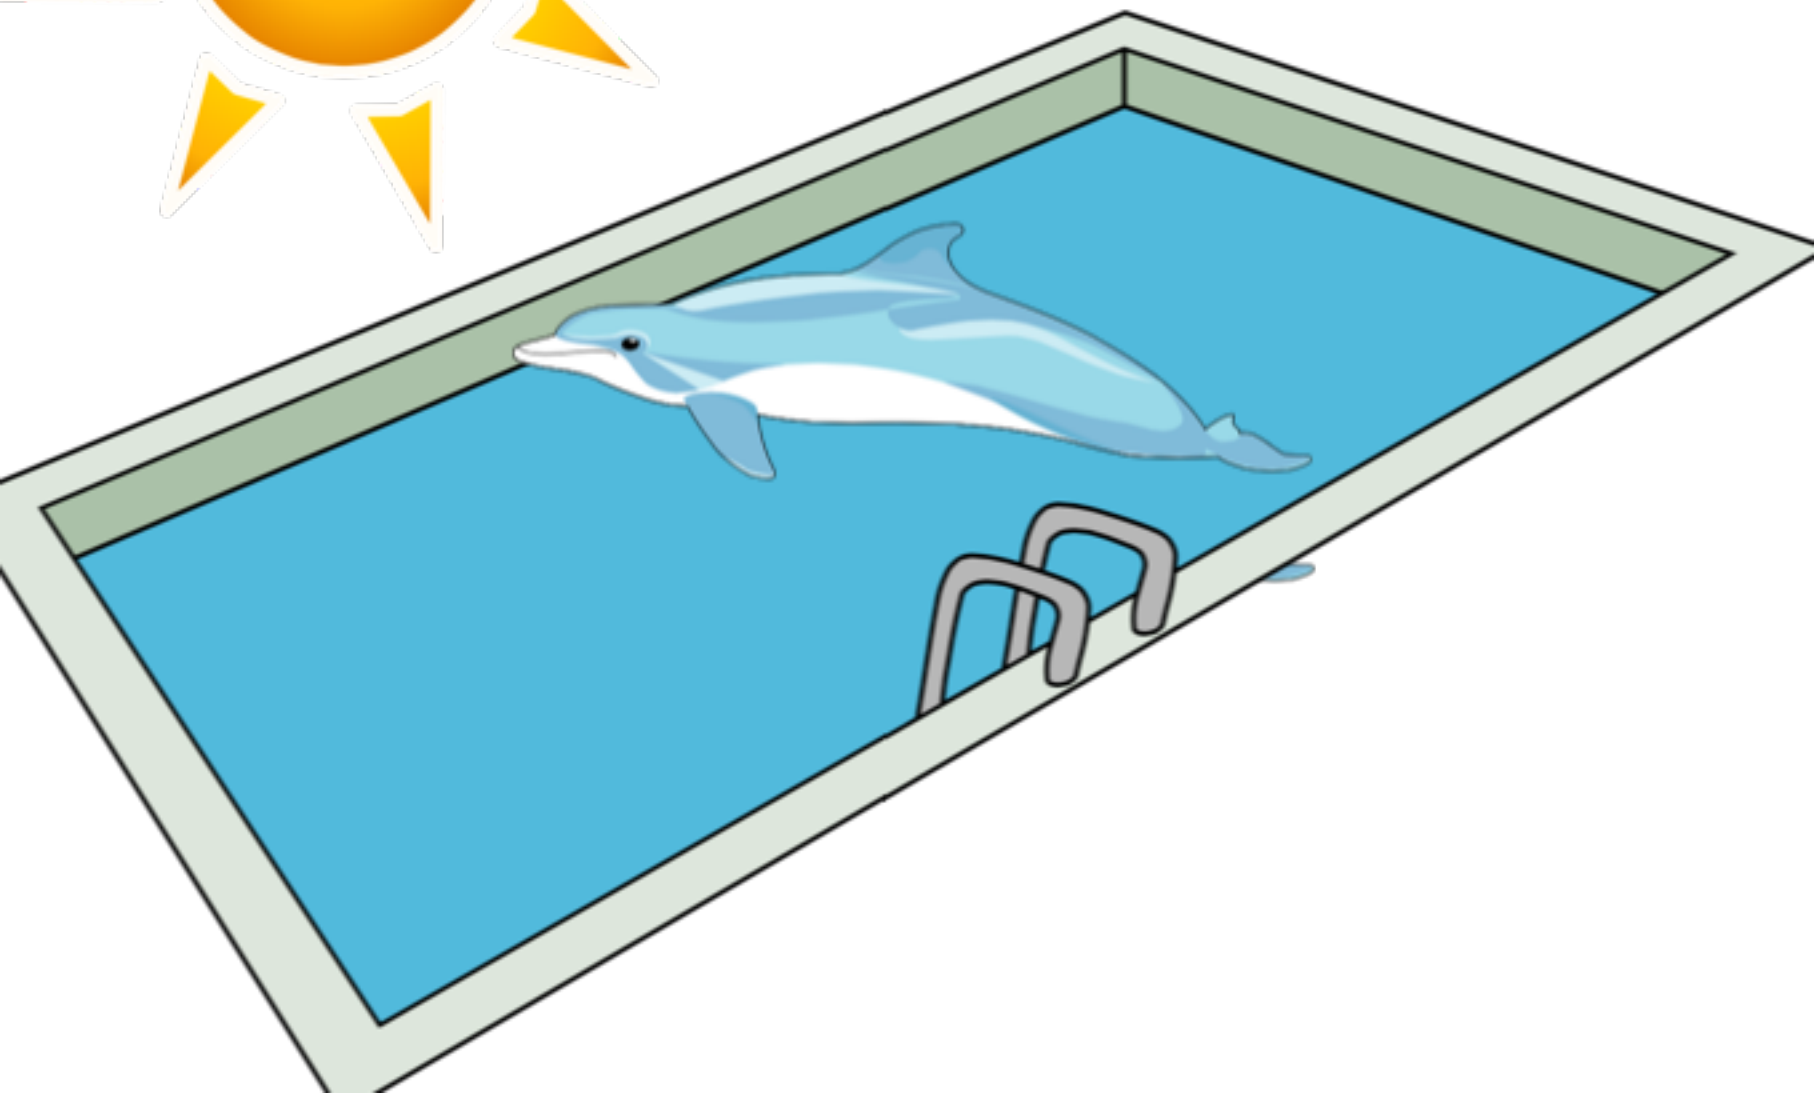

Alligators do not seem to move around much, but their jaws are big and scary! I hope that Bobby and I don't have nightmares after seeing them today.

Just when you think there is nothing else the
aquarium could offer, they save the best for
last...

The aquarium now has a dolphin show that you can watch in an arena outside the aquarium. The dolphins wave with their tails and jump through hoops and do all sorts of tricks!

If you sit too close to the pool, though, you are likely to get splashed! Watching the dolphins jump and play is the perfect way to end this incredible day before we walk to the car, get some food and drive home.
